DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/30/2007 has been entered.

Rejection Repeated

2. The 35 U.S.C. 102(b) rejection of claims 1,5,7-9,15-17,23 anticipated by Surampudia et al. has repeated for the reasons previously made in office action 10/30/2006.
3. The 35 U.S.C. 103(a) rejection of claims 11-13,19-21 over Surampudi et al. in view of Von Andrian has repeated for the reasons previously made in office action 10/30/2006.
4. The 35 U.S.C. 103(a) rejection of claims 10 and 18 over Surampudi et al. in view of Tsuki et al. has repeated for the reasons previously made in office action 10/30/2006.

Response to Arguments

5. Applicant's arguments filed 3/30/2007 have been fully considered but they are not persuasive.

In response to applicant's argument that Surampudi does not disclose or suggest wherein the heat exchanger exchanging heat between the liquid fuel supplied by the

fuel supply unit to the anode and an exhaust exhausted from the liquid fuel cell wherein the exhaust is exhausted from the anode, Surampudi discloses that the carbon dioxide produced by the electrochemical reaction when the water and fuel mixture circulates past the anode is withdrawn along with the fuel and water solution through the outlet 23 (col. 5 line 6-7) and that the heat exchanger receives the output from the anode outlet (col. 3 line 44).
